***Specification***

The disclosure is objected to because of the following informalities:

On Paragraph 0004 of the disclosure, claims 1, 8, 12 and 17 are cited to describe the invention, however these claims have been cancelled from the application.

Appropriate correction is required.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 35 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite in that it fails to point out what is included or excluded by the claim language. This claim is an omnibus type claim.

Claims 21 and 31 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 20 and 31 recite the limitation "the spherical domain" in line 4. There is insufficient antecedent basis for this limitation in the claim.

***Allowable Subject Matter***

Claims 21-30 and 32-34, 36-38 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

-----

Claims 20-38 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

The following is a statement of reasons for the indication of allowable subject matter: the present application is related to a method and apparatus for the digitization of analog source signals in which a D-dimensional spherical logarithmic quantization of the analog source signals is carried out. the claims are allowable because the prior arts of record do not teach transforming the digitized source signals from the time domain to spherical domain wherein the transformation is a D-dimensional transformation with  $D > 2$  as recited in the claims.
